

Overview

The Adult Admission Assessment has been designed as a comprehensive assessment that contains all the initial assessments that are completed on a patient at admission. This means that all of these assessments can be completed in one place.

The information contained in the Adult Admission Assessment is:

- Admission Checklist
- Allergies and AR's
- Alerts
- Waterlow / Malnutrition Screen / Skin Assessment
- Ontario Falls Risk Screen
- Immunisation / Infectious Contact
- Discharge Planning
- Patient Belongings and Valuables Checklist

Conditional sections are activated dependent on answers throughout the form such as:

- Substance Use Risk Screen
- Delirium Risk Screen
- Abbreviated Mental Health Test
- Specific Patient Belongings screens

A view of the scores of assessments will be available on the Patient Summary View as will a view of the completed document.

OMS Falls Risk: Total	! 30 ▲	12/06/14
Form Score		13:55
Waterlow Score	! 29	12/06/14
		13:55

A rule will automatically create a task on admission for the assessment to be completed. This will become overdue if not completed within 8 hours. Rules will also automatically create a number of tasks when the assessment is completed and signed. The tasks created will depend on the patient's age, indigenous status and/or how the assessment is completed.
