

Paediatric Admission Assessment

Fact Sheet

Overview

The Paediatric Admission Assessment has been designed as a comprehensive assessment that contains all the initial assessments that are completed on a patient at admission. This means that all of these assessments can be completed in one place with the option of saving the document and returning later to complete if necessary.

The information contained in the Paediatric Admission Assessment is:

- Paediatric Admission Checklist
- Immunisation / Nutrition
- Allergies and Adverse Reactions
- Falls Risk Assessment
- Pressure Injury Risk Assessment
- Behaviour Risk Assessment
- Manual Handling Risk Assessment

Paediatric Admission Checklist
Immunisation / Nutrition
Allergies & ARs
* Paediatric Falls Risk Assessment
* Pressure Injury Risk Assessment
Pressure Injury Alert
* Behaviour Risk Assessment
* Manual Handling Risk Assessment

A view of the scores of assessments will be available on the Patient Summary View as will a view of the completed document.

Assessment Scores (4) +		
Selected visit		
Behaviour Risk Score	2	12/06/14 14:38
Falls Risk Total Score	↑ 15	12/06/14 14:38
Manual Handling Risk Score	! 9	12/06/14 14:38

And a view of the text rendered version is available via the documentation component.
